Questionnaire about Road Accidents

Do different lighting conditions significantly impact accident severity?	Are more accidents occurring during daylight than at night?	Is there a specific time of day when accidents and casualties are most frequent?	How does Junction Control on Specific Peak Hours Contribute to Accidents?	Is there a correlation between the number of vehicles involved in an accident and the number of casualties?	Do roads with higher speed limits (50+) have more severe accidents compared to lower speed limits (<30) in Different Weather Types?	Are rural road accidents at higher speed limits more severe than urban road accidents at the same speed limits?	Do accidents in urban areas occur more frequently during the day, while rural accidents occ..
